

## Using New TU Wireless Networks

All faculty, staff, and students that use the TU Wireless network should configure their Macs to connect to the **tu-secure** wireless network. All visitors to the campus will need to connect to the **tu-guest** wireless network.

On **January 3, 2011**, the TowsonUWireless network will be retired and no longer function. Only the **tu-secure** or **tu-guest** networks will be available.

For details on the new TU Wireless network connections, see:
