

# iPad, iPhone, and iPod

## tu-Secure Wireless Configuration Instructions

OTS PUBLICATION: WR22 • REVISED 11-18-10 • TRAINING@TOWSON.EDU • OFFICE OF TECHNOLOGY SERVICES

=Shortcut =Advice =Caution

### Overview

Below are the instructions to configure your iPad, iPhone, or iPod to work on the **tu-secure** wireless network. tu-secure is the recommended wireless network for Towson faculty, staff, and students because it will provide the most secure and stable connection to the Towson network and provide access to campus resources such as your H: drive.

If you need additional assistance:

**Faculty staff:** contact the Faculty/Staff Help Center at 410-704-5151, select menu options 2+2+2.

**Students:** contact Student Computing Services Faculty/Staff Help Center at 410-704-5151, select menu options 2+1+3.

### Process Summary

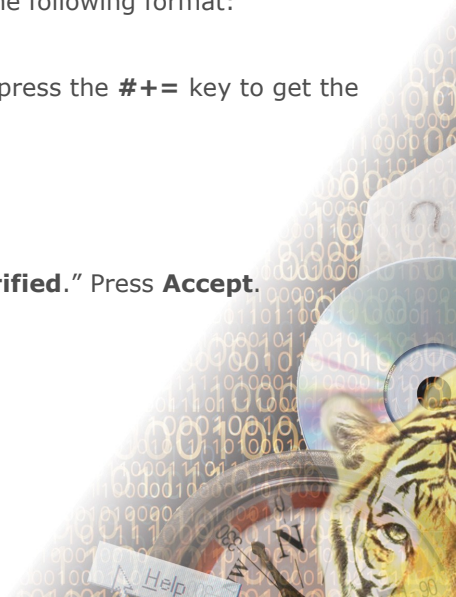

#### Overview

**Configure iPad, iPhone, iPod for tu-secure**

### Configure iPad, iPhone, or iPod for tu-secure

To configure an iPad, iPhone, or iPod to connect to tu-secure, follow the instructions below:

1. Press **Settings**
  2. Select **Wi-Fi**
  3. Make sure that **Wi-Fi** is sent to **ON**.
  4. Under **Choose a Network...** select Other
  5. Under **Name** enter **tu-secure**
  6. Under **Security** press the arrow, and select **WPA2 Enterprise**
  7. Press **Other Network** to go back to enter more settings
  8. Enter your Towson NetID (username) next to Username in the following format:  
**towson.edu\jsmith**
- Note: Press the **.?123** key to pull up the number pad, then press the **#+=** key to get the correct slash \
9. Enter your password.
  10. Press **Join**.
  11. You will get a message that says "**the certificate is not verified.**" Press **Accept**.
  12. You should now be joined to the tu-secure network

## Students Connecting to tu-secure

For **students** to access tu-secure on a computer, follow these additional steps below.

1. Download and install the Cisco Clean Access client on the computer by following the appropriate instructions below.

For Windows: [PC Clean Access Agent - Student Connection to tu-secure](#)

For Macs: [MAC Clean Access Agent - Student Connection to tu-secure](#)

Note: Must have administrator rights on a computer to install the client.

2. After installing the client above, the **Cisco Clean Access** dialogue box will popup (Fig 1, 1) when students access the tu-secure network. Use your **NetID** to login and complete you connection to the network.
