

# Towson University VPN Installation Guide

## Requirements:

Administrator rights are needed to install the VPN client. To obtain administrator rights on university computers, contact the Help Center 410-704-5151, option 2+2+2.

**Step 1:** Open Internet Explorer.

**Step 2:** In the URL address bar of your browser, type <https://vpnc.towson.edu/>

**Note:** Don't forget to add the **S** after http in the address above.

Select Continue at the "WARNING! Connecting to this network..." popup window.

**Step 3:** At the Log in prompt (Fig. 1), type TowsonU username and password, and then select Login.

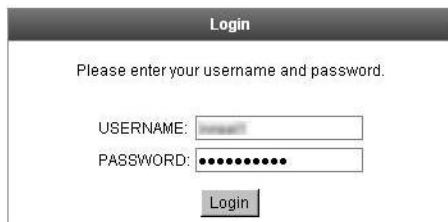

Figure 1

**Step 4:** An Information Bar window may popup (Fig. 2).

Select Close to close the box and continue. If you do not see this message, then skip this step and move on to step 5.

Figure 2

**Step 5:** After downloading and installing the VPN client, the following warning window will may appear (Fig 3). Select Run to continue. If this window does not appear, continue to Step 6.

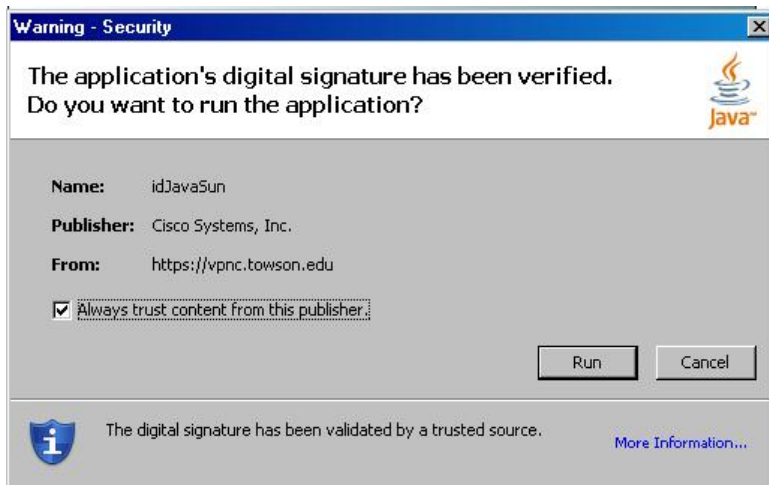

Figure 3

**Step 6:** When the installation is complete the following window will popup to verify that you are connected to VPN (Fig. 4)

Figure 4

After installation completes, verify that the AnyConnect VPN Client is visible in the Start Menu, (Fig 5)
