Market Share of Undergraduate State Residents Enrolled in Maryland Higher Education

In Fall 2005 there were 76,544 Maryland residents enrolled as undergraduates in Maryland public, four-year higher education institutions of which 31% were African-Americans (Table 1). About 16% of all undergraduates and 6% of African-Americans attended Towson University. The range of Towson University's market share of enrolled students varied from county to county for all students and for African-Americans (Table 1).

Residents of some counties favored particular schools (Table 3). For example, 81% of Allegany residents attended Frostburg, and 33% of Carroll County residents enrolled at TU. More than half of Howard County residents enrolled at UMCP and UMBC while slightly under half of those from Montgomery County enrolled at UMCP. Generally speaking, Maryland residents tended to enroll in schools near their homes.

Each institution tended to have high percentages of students from a few counties (Table 4). Slightly more than one-third of Maryland residents who attended TU came from Baltimore County. Almost 33% of UMCP state residents came from Montgomery and Prince George's counties. About two-thirds of state residents enrolled at UMBC came from Anne Arundel, Baltimore, Howard, and Montgomery counties. Furthermore, just slightly more than two-thirds of all those enrolled were residents of Anne Arundel, Baltimore, Montgomery, Prince George's counties and Baltimore City.

When reviewing percentages within these tables caution should be exercised where low numbers are involved (Table 2).
