

# College of Education

## NEW! 2009 Summer Trimester Course Offerings

For the 2009 Summer Trimester the College of Education will offer students a chance to take primarily lower level courses that are General Education or pre-requisite courses needed for entrance into professional programs in education. Ten courses are offered, allowing students to potentially enroll in as many as four courses across the two 5-week sessions. One course is offered fully online.

### Benefits of the Summer Trimester College of Education Courses

- By employing two 5-week sessions students have a great deal of flexibility to mix and match courses with their academic program needs.
- Taking one or more of these classes during the summer will give students a head start on program entrance requirements

### Courses offered — Summer 2009
