

Department of Health Science

New Undergraduate Trimester Program Starting in Summer 2009

The Department of Health Science is offering a new trimester plan starting in Summer 2009. The trimester plan is open to transfer students, students who are changing majors and Health Science and Dual majors. The new options are designed to offer students the opportunity to take the three basic core courses for the major. These core courses are also the screening courses that help to determine eligibility for full major status. In addition, the Department of Health Science is offering courses that will allow students to get a head start on some of their other required courses.

Benefits of this Trimester Program

- Availability of prerequisite lower level courses required for the major
- Students who are entering the major later in their academic careers will be able to take courses that will allow them to graduate within a reasonable timeframe
- Department trimester advisor available to meet with students beginning Spring, and continuing through summer and Fall '09.

Eligibility for this Trimester Program and Application for the Program

Transfer students, new HLTH or DUAL and current HLTH or DUAL students, are all eligible to participate in the summer trimester plan. Please consult the course prerequisites.

If you have questions regarding the trimester plan please contact:

Dr. Deitra Wengert
